Sign up with email / password

You can create a new email and password user by issuing an HTTP POST request to the Auth signupNewUser endpoint.

Method: POST

Content-Type: application/json

Endpoint

https://identitytoolkit.googleapis.com/v1/accounts:signUp?key=[API_KEY]

Request Body Payload

Property Name	Type	Description
email	string	The email for the user to create.
password	string	The password for the user to create.
returnSecureToken	boolean	Whether or not to return an ID and refresh token. Should always be tr

Response Payload

Property Name	Type	Description
idToken	string	A Firebase Auth ID token for the newly created user.
email	string	The email for the newly created user.
refreshToken	string	A Firebase Auth refresh token for the newly created user.
expiresIn	string	The number of seconds in which the ID token expires.
localId	string	The uid of the newly created user.

Sample request

```
curl 'https://identitytoolkit.googleapis.com/v1/accounts:signUp?key=[API_KEY]' \
-H 'Content-Type: application/json' \
--data-binary '{"email":"[user@example.com]","password":"[PASSWORD]","returnSecureToken":tr
```
